(Electronic Data Collection System)  
BAPLIE NEW OPTION**

(Bayplan/stowage plan occupied and empty locations message)  
Revised: June 9, 2010

The ACP has already implemented a BAPLIE upload option within the CARGO DECLARATION MODULE in EDCS. This option converts the BAPLIE into the current Cargo Declaration; therefore, it contains many required validations to comply with the cargo data requirement, such as flashpoints, harmonized codes and others.

This new module, called **BAPLIE DECLARATION**, allows you to submit the BAPLIE with all of its contents, as it is handled from port to port. Please note that this BAPLIE requirement is in addition to the current pre-arrival information (SHIP DUE, CARGO DECLARATION (CAD), CREW LIST and PASSENGER LIST).

- 1) The users CUSTOMER, AGENT and ETA CLERK are allowed to upload BAPLIE FILES in the available vessel's visits within their profiles by choosing the 'Create' option.

- 2) When this option is selected the system will display the approved vessel's visit for the user's profile.

## 10) Validations Error messages programmed in the system:

### Missing Message Type BAPLIE within UNH segment

PROCESSING FAILED : DOCUMENT/MESSAGE TYPE NOT FOUND FOR BAPLIE

Solution: Open File, correct the information, and upload the file.

### Missing '+' after EQD in segment group 6

GENERAL# -> UNKNOWN DATA FOUND IN MESSAGE - EQDCN

Solution: Open File, correct the information, and upload the file.

### Container ID Length

C30/Container ID: Length is too large for Container ID - UGMU85376085423464

Solution: Open File, correct the information, and upload the file.

### Missing Container Code

C31/Container Code (Derived): (UGMU85376085423464) Container code is missing from BAPLIE submission.

Solution: Open File, correct the information, and upload the file.

### Container Code (size/type) is not present in the ACP tables

C33/Container Size: (UESU2287705+22GL0) Container size or size type cannot be derived from container code obtained in BAPLIE submission.

Solution: Open File, correct the information, and upload the file. If code is correct, please send a message to [baplie@pancanal.com](mailto:baplie@pancanal.com).

### Missing container Location, should get the below error message

C31/Container Location: Container Location is missing for Container ID - UGMU85376085423464

Solution: Open File, search for the container if given and correct the information, and upload the file.

### Incorrect 147 code in segment 5 beginning occurrence

PROCESSING FAILED : SEGMENT 5 DOESN'T START WITH LOC+147

Solution: Open File, correct the information, and upload the file.

Missing 147 in between occurrences in segment 5

Allowed value is LOC+147 only

Solution: Open File, correct the information, and upload the file.

Missing 147 in whole BAPLIE EDI file

PROCESSING FAILED : LOC+147 IS NOT FOUND IN EDI CONTENT

Solution: Open File, correct the information, and upload the file.

**Incorrect file extension (edi)**

PROCESSING FAILED : EXCEPTION OCCURED WHILE TRANSLATING MESSAGE  
Translation service '' not found for application ID 'ADC'

Solution: Open File, correct the information, and upload the file.

**Incorrect file size**

Your file is of size:<>bites. The BAPLIE submitted has exceeded the file size limit of 800,000 bytes

Solution: correct the information and re-generate file, and upload the file (this shall be done by the originator)

**Incorrect BAPLIE structure**

Document translation Failed: 1. GENERAL#GROUP-5, OCCURENCE-386, SEG-UNT, SEGNO-0370, ->MANDATORY SEGMENT HAS TO BE SPECIFIED 2. GENERAL#->UNKNOWN DATA FOUND IN MESSAGE – ELD

Solution: correct the information and re-generate file, and upload the file (this shall be done by the originator)

**Incorrect tally in UNT segment**

DOCUMENT TRANSLATION FAILED: 1. General #->Number of Segments in Message not tally with UNT-number-of-segments

Solution: correct the information and re-generate file, and upload the file (this shall be done by the originator)

**Missing tally count in UNT**

PROCESSING FAILED : TOTAL NO OF COUNT IN UNT IS MISSING

Solution: correct the information and re-generate file, and upload the file (this shall be done by the originator)

**Missing interchange control count in UNZ**

DOCUMENT TRANSLATION FAILED: 1. General #DataElement->UNZ – Interchange Control Count must be specified.

Solution: correct the information and upload the file.

NOTES:

- a) The BAPLIE files is only required for full container vessels planning to arrive to Panama Canal for transit, and it is required to be sent at least before its arrival. NOTE: It is in addition, to the current Cargo Declaration submittal.
- b) If vessel is visiting other ports close or within the Panama Canal, before its transit, it is require to submit BAPLIE revises. The last revised shall be sent, at least 4 hours after departing such port.
- c) For those vessels with cargo partners in its voyage, only the declared principal cargo owner (entered in the vessel's visit within EDCS), shall be able to upload the BAPLIE files.
- d) For General assistance in the EDCS contact: [Soporte@pancanal.com](mailto:Soporte@pancanal.com)
- e) Para información general o sugerencias en este proceso BAPLIE, favor enviar sus notas a: [baplie@pancanal.com](mailto:baplie@pancanal.com)
